

BioFlora™ Calcium 8%

AG

BioFlora™ Calcium 8% is a soluble liquid product formulated to correct calcium deficiencies in all types of plants. It is a biorganic product chelated with natural hydrocarbons. It is readily assimilated into the root stem and leaf cells of plants. **BioFlora™ Calcium 8%** contains several sources of calcium along with nitrogen and biostimulants from seaweed (*Ascophyllum nodosum*) extracts produced exclusively by **Global Organics**. The unique carbon and organic acid structure of **BioFlora™ Calcium 8%** and its quick uptake into the plant help in the following ways:

- May increase photosynthetic capacity and chlorophyll synthesis.
- May increase membrane permeability.
- May increase climatic stress resistance to excessive heat or freezing conditions.
- Strengthens cell walls.
- Stimulates cell division and metabolism.
- Reduces plant senescence processes.

Guaranteed Analysis:

Total Nitrogen (N).....	6.00%
4.00% Nitrate Nitrogen	
2.00% Urea Nitrogen	
Water Soluble Calcium (Ca).....	8.00%

Derivation:

Derived from urea and calcium nitrate in a biologically active base.

Density:

11.50 lb per gallon
1.38 kg per liter

Directions for Use:

BioFlora™ Calcium 8% is a systemic nutrient and should be applied prior to heat or cold waves, drought and other conditions which limit calcium intake. Use as a foliar or soil application. Product should be mixed with 40-50 gallons of water prior to application.

KEEP AWAY FROM CHILDREN. NOT FOR HUMAN CONSUMPTION.
Note: Buyer assumes all risk of use, storage and handling of this material. Neither seller nor its agent make any warranty, expressed or implied, concerning this product, except in conformity with statements on the label.

Application Rates:

Trees: Two gallons total for growing season.
Row Crops: One gallon total for growing season.
Use in conjunction with plant tissue and soil tests. Call a **Global Organics** representative for additional crop information.

Handling:

In case of accidental exposure, flush with plenty of water. Product is non-hazardous. Protective gloves and eye protection recommended.

Compatibility:

Do not mix with phosphate fertilizers in low volume irrigation systems. Avoid mixing with **Humega™**, aqua ammonia, urea sulfuric acid, soil fumigants, phosphorus or sulfate-based materials.

Storage & Handling:

Do not store in galvanized steel or black iron tanks for prolonged periods; use non-metal piping and valves. Store in cool, dry place out of direct sunlight.
